

Webinar by Vinod Tantri

The COVID19 pandemic has left the world population in an abyss. People are unsure of what lies ahead of them as the pandemic has thrown all our personal and professional life goals out of gear. In order to clear some of this uncertainty especially among the fresh graduates, Seshadripuram Institute of Management Studies organized a webinar on 23rd May 2020 which was piloted by Mr. Vinod Tantri, Founder of Knowledge Bell and a renowned career coach.

Mr. Tantri threw light on the plethora of opportunities that have risen up due to the pandemic which young graduates can exploit in order to shape their careers ahead. Digital skills have become indispensable today for all organizations who treat that as a mandatory requirement whilst recruiting their workforce. Mr. Tantri gave a wonderful illustration of the same and also hosted a very interactive Q&A session at the end of the webinar where he answered the numerous questions that were left by the participants in the webinar chat.

Overall, the webinar was received well by all the participants who reverted with a positive feedback post the session.
